HARDY GIANT CULTIVATED BLUEBERRIES

Not only does the blueberry produce big juicy berries 2 to 3 times as large as common blueberries, but it is ornamental on the lawn or in the shrubby border and very easy to grow. The foliage is dark green, long and narrow, blossoms bell-shaped and pinkish white. During the autumn the leaves turn bronze, and during the winter months the twigs are red. The bushes will grow to the height of 8 feet.

For the best results plant on acid soil. Low muck or sand soils are usually very acid. Plant two or more plants to insure proper pollinization. If your soil is not acidity, mix the soil with our SPECIAL IMPORTED PEAT MOSS, see page 11. Set the plant and fill the hole with the same mixture and keep the soil moist.

GIANT BLUEBERRIES

Just Think! Giant berries, many three-fourth of an inch across. Plump and juicy, sweet and full-flavored. Mild enough to be included in any diet. Fresh ripe berries require no sugar, canned berries very little. Ideal for freezing and very delicious for pies. Every bush is a heavy producer, four bushes in your yard will provide enough berries for pies throughout the season.

BARTLETT

There's hardly a person that doesn't know the Bartlett Pear and its qualities, as it is grown in, and adaptable to all different climates, soils and situations. Fruit is large, golden yellow in color with a reddish blush on the sunny side. Flesh is tender and juicy, with a delicious musky aroma. Trees are vigorous, attain large size, bear young, live long, and barring frosts or freezes, they bear full crops year after year. Justly the leading commercial Pear—a leader among canning Pears. Fruit ripens early September.

KIEFFER

One of the largest best known Pears. One of the best canning varieties and is possibly planted in more home orchards than any other variety. One of the easiest Pears to grow, less subject to blight than many varieties, strong grower, early and prolific bearer. Golden background, with a red blush. Recommended not only for the home orchard but for the local market and roadside stands. Ripens in late October, heavy yielders. AVAILABLE ONLY IN THE 4 YR. 6 TO 8 FT. KING SIZE TREES, \$2.85 EACH; 2 FOR \$5.50; 5 FOR \$13.00; 10 FOR \$24.50.

BOSC

There is no finer flavored Pear than the long necked Bosc, which is sold on the fancy fruit stands at a handsome profit. Firm skin makes it a wonderful keeper. Unequaled as a dessert Pear with its very firm, sweet white flesh.

CLAPP'S FAVORITE

An early ripening Pear—about 10 days earlier than Bartlett. Attractive fruits are large and of uniform size, with beautiful green skin deeply blushed carmine-red. Flesh is white, crisp, sweet and juicy. A good shipper and good canning variety. Hardy, strong grower. For Prices See Top of Page.

NEW COVERT PEAR

Covert is one of the largest of all cultivated pears. It resembles Bartlett in shape with the same roughened surface and has about the same green color which mellow into a clear Bartlett yellow when fully mature. The fruit is about one month later than Bartlett, very firm, and handles unusually well. Canning tests indicate that the canned product is equal to Bartlett and much better than Kieffer. The tree is a cropper. Covert bids fair to replace Kieffer for canning. AVAILABLE ONLY IN THE 4 YR. 6 TO 8 FT. KING SIZE TREES, \$3.65 EACH.

A Few Simple Reasons Why You Can Buy For Less At Zilke's

You will find that this money saving book is made especially for farmers, home owners, fruit growers and gardeners, giving them a chance to buy better stock for less, direct from our nursery at wholesale prices.

We can sell better stock for less because we are not jobbers or dealers. We own and operate our own farms in the heart of the Michigan fruit belt, our farms are of the best soils for developing good roots, hardy stock that will grow anywhere. We grow a tremendous amount of stock, which is handled only once, direct from our farms to you our many customers.

We sell direct from this catalog only — you have no agents or salesmen commissions to pay — thousands of satisfied customers can't be wrong.

We do not spend thousands of dollars on highly colored catalogs, because it is very costly and makes the stock more expensive, this extra cost must be added to the price of the stock, either in higher prices or poorer quality . . . it is the customer that finally pays.

We have no large, expensive, splashy advertising space, we depend largely upon our friends and our satisfied customers to advertise our stock. These extra savings are passed on to our customers in better stock for less money.

We can offer you good stock for less money because, first of all we have excellent soil, and next we have the latest equipment in up-to-the-minute tractors, automatic sprayers, planters, trenchers, power lifters, loaders, and many other labor-saving devices. All of these combined savings are passed on to our customers in lower prices and better stock.

In ordering your nursery stock needs from Zilke's you are assured of getting stock that is absolutely fresh in every way. Compare our fresh plants and trees with those that are kept in a frosty condition or in storage and in a dry condition for four or five months.

Order direct from Zilke's the grower and see the big difference.

FOR CUSTOMERS WHO LIKE TO CALL AT THE NURSERY

During the shipping and planting season we are open for business 7 days a week, from morning to night. Spring season is from about March 15th to June 1st. Fall planting season is from about September 15th to November 20th, according to the weather conditions.

We also have larger sizes of Shade Trees; heavy transplanted, well branched Crimson King Maples, up to about 15 feet tall, big, well branched transplanted Maple Trees up to about 20 feet tall; heavy well branched pure white Birch Trees up to about 20 feet tall; also many other Trees, Shrubs, Evergreens and Imported Peat Moss for the cash and carry trade (these are too large to ship). This stock will be packed while you wait, same will be prepared as you can haul it on your car.

We are located directly $\frac{1}{4}$ mile west of Baroda, which is about 9 miles south of St. Joseph, on Cleveland Avenue. Watch for our sign on U. S. 12 Highway, 2 miles North of Bridgman or about 9 miles South of St. Joseph.

WE PAY POSTAGE ON SOME ITEMS LISTED IN THIS CATALOG

Please notice that we pay the postage on such items as bulbs, vines, perennials and strawberry plants, and they are so listed.

There are however some items that are not listed as prepaid parcel post, such as shade trees, fruit trees, roses, shrubs, evergreens and berry plants, because they are listed at such low price for our high grade quality stock that we cannot afford to pay the shipping charges.

For items that are not listed as prepaid see page 50 for shipping information.

In fairness to all of our customers it is impossible to list prepaid prices on every item that we sell because we ship to all parts of the United States.

We will fill your order with the same high grade quality stock regardless of the distance that you live from us, this is the only fair way, in other words "THE ZILKE FAIR METHOD OF DEALING".

Often times mail order nurseries list such items as trees or shrubs at prepaid price then ship small skimpily rooted weak light stock to keep the postage down or else charge much more than the original price should be and still skimp on the stock for a profit.

A good share of the nursery stock can be shipped by parcel post, including 5 to 6 feet trees. Super size trees can also go parcel post with our scientific method of packing.

Send your order to ZILKE BROTHERS NURSERY the growers and be sure of the best in nursery stock.

SHOP BY MAIL DIRECT FROM THE GROWER

You can make your selections in the comfort of your own home from this complete, fully illustrated nursery catalog — this catalog offers you a complete, inexpensive nursery department store as close as your mail box. There is no risk in mail order buying because you are protected by our written guarantee. Order now and save.

As this is our only salesman, we again take pleasure in coming to you with this small catalog of big nursery bargains. We again offer you the highest quality hardy northern grown stock at wholesale prices. Through these annual catalogs and your business with us we feel acquainted with you. Whether your order is for \$1.00 or \$50.00 it will receive our personal attention and you will get a square deal.

You probably will receive a great number of catalogs this spring, listing many varieties of fruit of every description, but just remember that the Zilke Nursery is offering only the best of each class, the kinds that produce the most and best crops or fruits, that thrive and show the most natural disease resistance. Every plant, tree, shrub, and bulb that we offer is State inspected and free from disease.

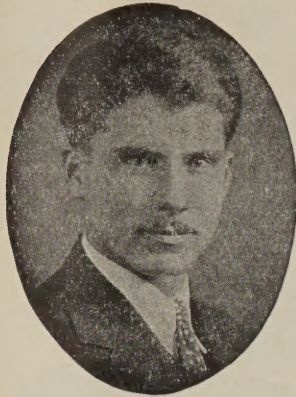

Varieties are an important consideration in planning either your fruit garden or your ornamental planting. Some of the old varieties are still in first rank, but many must give up their places to newer and finer kinds. We urge you to give the new 20th Century Strawberry, Everbearing Durham and Black Magic Raspberries, Giant Red Grape and Paper Shelled Carpathian English Walnut a fair trial. We feel sure you will be more than pleased with the results.

Here at the Zilke Nursery we utilize every known scientific method of selection, breeding, production and protection in shipment that will insure your getting perfect plants in perfect condition, with strong, fibrous roots for quick, sure growth.

It will be our constant study in the future, as it has been in the past to give perfect satisfaction to our old customers as well as our new ones who entrust their order with us. Our success, we feel confident, depends wholly on the satisfaction we may be able to give our customer friends.

The Zilke Guarantee of Satisfaction

We guarantee all plants and trees sold by us to be State Inspected and apparently free from disease and insect pests. We also guarantee them true-to-name, and will replace, free of charge any that may prove otherwise through possible error.

Rudolph H. Zilke, Jr.

We guarantee all plants, trees, shrubs, bulbs and seeds to reach you in good growing condition or will replace any stock that arrives in poor condition, if we are notified within five days after you receive the shipment. It is mutually agreed between ourselves and the customers that we shall not be liable for more than the original purchase price.

We will replace any stock at one-half of the catalog price that does not live the first season, if you think it was the fault of the stock in any way, providing the complaint is received before July 1st of the year planted. It is impossible for us to consider any claim made after July 1st.

It is a freestone and a self-pollinizer. Enormous producer.

Redhaven matures very early, about a month before Elberta. Fruit medium in size, of slightly elongated shape, and almost completely covered with a brilliant red color. Skin is smooth and tough. NEW REDGLOBE PEACH

THE NEW REDGLOBE PEACH TREE WAS DEVELOPED BY THE U. S. DEPARTMENT OF AGRICULTURE, BELTSVILLE, MARYLAND.

This new red peach ripens about 15 days before Elberta. The fruit is of good size, round, with light pubescence. The skin color is especially bright and attractive. At maturity about three-fourths of the skin surface is covered with a bright red blush over an attractive yellow ground color. The flesh is yellow, very firm, fine texture, and good flavor. Has proven very attractive as a frozen product. Redglobe trees are productive and vigorous, blossoms are large and self-fertile. Its most outstanding characteristics are its high skin color and its firmness of flesh. Redglobe should be well suited to long-distant shipment. Has been tested in California, Texas and South Haven, Michigan and is very promising. Freestone. FOR PRICES SEE PAGE 9.

ZILKE'S HARDY NORTHERN GROWN TREES ARE BEST

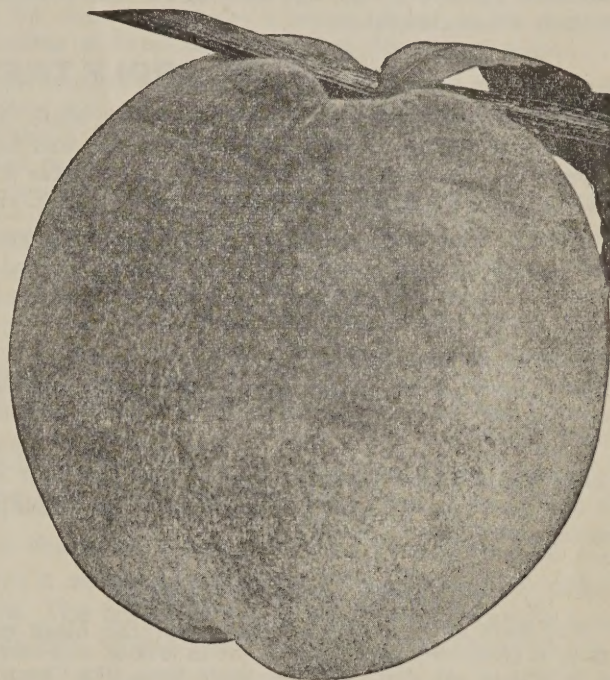

Get the Most from your Orchard by Ordering Trees from Zilke's

Zilke's Peach Trees are all grown on 2-yr. old roots, well-branched, very heavily rooted. Our buds are selected from the finest orchards and special trees.

THIS YEAR WE ARE PLEASED TO OFFER THE NEW RICHHAVEN AND NEW SUNHAVEN WHICH ORIGINATED AT THE MICHIGAN AGRICULTURAL EXPERIMENT STATION BY STANLEY JOHNSON.

NEW RICHHAVEN—Richhaven ripens with Halehaven, about 14 days before Elberta, but because of its bright color, it might be picked 2 to 3 days before Halehaven. Fruits are larger than Halehaven, nearly round, and uniform in size and shape. The ground color is bright golden, overlaid with a large, bright red blush on the area exposed to the sun, with stripes of red and gold on the opposite side. Fuzz is so short and soft as to be nearly unnoticeable. Flesh is clear yellow with moderate amount of red near pit. Medium in texture and resistant to browning. Freestone. Excellent for commercial canning. Unusual thick, tough skin adds to handling and shipping ability of fruit. Trees are large, vigorous and productive. Exceptionally hardy.

NEW SUNHAVEN—Very Early! 40 Days Ahead Of Elberta. The success of the Redhaven variety resulted in many requests for a variety of this type maturing earlier. Sunhaven is being introduced to meet this need. It ripens very early, 10 days before Redhaven and 40 days earlier than Elberta. Fruit is medium-large in size, nearly round, and uniform in shape. Skin color is much like Redhaven, largely bright red with enough bright golden color for pretty contrast. Short, soft fuzz, almost unnoticeable. Fruits keep and handle unusually well for such an early maturing variety. Flesh is clear yellow, fine-textured, firm, of good flavor and very resistant to browning. Sunhaven is a freestone when fully ripe. Its early ripening assures you of BIG PROFITS for your fruit.

Hansen Apricot

NEW HANSEN APRICOT

THE SUPER HARDY APRICOT

Hansen's new sensational Northwest hardy apricot. Recently introduced by Prof. N. E. Hansen, of South Dakota State College, who has been working for many years to produce hardy apricots that would be good eating and large size and still would withstand the rigors of Dakota's cold and drought. Two very important points of interest stand out in regard to these new apricots. One is that they are perhaps one of the most drought resistant of all trees, coming through the terrible droughts of 1933, 1934, and 1935 with flying colors—full foliage and no apparent effect whatever from the dry, hot weather, and with a great crop of fruit. The second point is that they are hardy almost anywhere in America, standing and bearing well in climates getting as low as 50 and 60 below zero. Prices: 3 to 4 foot trees \$1.65 each; 2 for \$3.15; 4 to 5 foot trees \$1.85 each; 2 for \$3.50.

DWARF ORANGE QUINCE

Sometimes called Apple Quince. Fruit large, round with a short neck; color bright yellow; flesh tender, juicy and of excellent flavor. Highly regarded for jellies and preserves. Trees bear young. A good tree to plant on hillsides or where land is hard to work, as it requires very little care. Good 3 to 4 foot trees, \$1.95 each; 2 for \$3.50.

Transplanted, Well Branched 4 yr. 3 to 4 foot trees, \$2.25 each; 2 for \$4.25.

RUSSIAN MULBERRY TREES

An ideal shade tree, luxuriant foliage, clean and hardy everywhere, a rapid grower. Bears an abundant crop of edible fruits which resemble blackberries and are very sweet. A few Russian Mulberry trees will save your cherry crops as the birds prefer the Mulberry to Cherries. Transplanted 3 to 4 foot \$1.25 each; 2 for \$2.25; Heavy 4 to 5 foot \$1.75 each; 2 for \$3.25; Extra Heavy 5 to 6 foot trees \$2.25 each; 2 for \$4.25.

Paw Paw

PAW PAW - Northern Banana

A small handsome tree with large purple flowers which are very beautiful and fragrant and large dark green foliage which make it a handsome tree for the park or lawn. Produce large yellow fruit which has the flavor and shape of the banana and is very delicious and attractive. Trees very hardy and productive. Can be grown in all sections of the United States. Should be planted in every lawn. 2 to 3 ft. size, \$1.65 each; 2 for \$3.00; 4 to 5 ft. size, \$2.45 each; 2 for \$4.45.

SHREWD BUYERS APPRECIATE THE SAVING OUR METHOD OF SELLING HAS MADE POSSIBLE

We realize highly colored catalogues printed on heavy glaze paper would be more attractive, however, you all understand that the buyers are really the ones who pay for fancy expensive catalogues. To pay for a big expensive catalogue the quality of the material sold must be lowered or the price must be raised. Shrewd buyers appreciate this.

DWARF EVERBEARING FIG Grow Your Own Large Sweet Figs

This new fig is fine for commercial as well as for home use, can be used as fresh fruit, canned or dried. The fig is large, straw colored thin skin, yellowish pink meat, finest flavor, sweet, prolific. The skin rarely ever cracks. Ripens fruit over a long season, starting in August and still bearing heavy in October. If your temperature does not go much below zero in winter then cut fig limbs back to 10 inches high and cover remaining stubs with about 8 inches of dirt, a few leaves or straw will also help. Do this in the fall before frosts, remove protection in the spring after danger of frost is over. The fig plants grow very rapidly after protection is removed, often growing to a height of 7 feet in one season. The fruit is produced on the 1 year wood. Heavy well rooted 2 to 3 foot \$1.35 each; 2 for \$2.65; 5 for \$6.30.

HARDY DISEASE RESISTANT NUT TREES

PAPER SHELLLED CARPATHIAN ENGLISH WALNUT

FAMOUS HARDY CORSAN STRAIN

This Hardy tree is growing in many parts of the world; the hardiest is found in Russia, Poland and Northern Carpathian mountains where the winter temperature at times drops to more than 40 degrees below zero.

It was from these countries that the original stock was brought to Canada about 20 years ago, and since then has been propagated in Michigan.

The trees have a gray colored skin, leaves are large, glossy and nicely scented. Nuts vary in size from that of the California English walnut to twice this size. Nuts fall free of hull. The shell is thin and breaks very easy. In Canada this variety is a heavy producer, grows rapidly, bears at an early age.

CHINESE BLIGHT RESISTANT CHESTNUT

GROWING YOUR OWN LARGE, SWEET CHESTNUTS IS A PLEASURE

A number of years ago the Chestnut blight destroyed the Native American Chestnuts. The U. S. Dept. of Agriculture—after many tests—introduced a type of

Chinese Chestnut not only blight-resistant, but an early-bearer of large, good quality nuts. Trees start bearing when very young, often in 2 to 5 years, and succeed anywhere the American Sweet Chestnut formerly grew;

Chinese Chestnut

in fact they can be grown over a wider area and may be grown wherever Peaches thrive. We recommend planting in a well-drained, sunny location. Plant the Chinese Chestnut for attractive home ground shade trees and also reap a harvest of delicious, sweet nuts. ZILKE'S NEW RED EVERBEARING RHUBARB

McDonald Rhubarb

ZILKE'S EVERBEARING MCDONALD RED RHUBARB—is the finest of all Rhubarb. The stalks are giant in size, twice as large as ordinary Rhubarb. Bright red color. Very tender and stays tender a long time. It has the richest flavor and also more sugar, therefore requires less sweetening when cooked. It makes the finest Rhubarb pies and sauce you ever tasted. The skin is a bright red, but the inside flesh is white, so when the sauce is cooked it has just enough tinge of red to make it look appetizing. It is a tremendous yielder, that is why we call it everbearing, because as fast as you pull one stalk another comes up to take its place. You can use it over a much longer period of time than ordinary Rhubarb. The stalks are 18 to 24 inches long, many half as thick as your wrist. Nothing you can plant in your garden will give you more returns than McDonald Rhubarb. We recommend it very highly, not only because it is healthful, but because it tastes so good. Lasts a life time. Heavy 2 yr. 75¢ each; 3 for \$1.95; 10 for \$5.50.

SAGE — A perennial herb that is indispensable for seasoning meats and poultry stuffing, sausage, etc. Plants are hardy and will grow for years without replanting. 2 year plants, 35¢ each; 3 for 90¢, Postpaid; 6 for \$1.50, Postpaid.

New Paradise Asparagus

**MATURES A YEAR EARLIER—PLANT THIS SPRING
HARVEST FIRST CROP NEXT YEAR!**

For this year we offer this wonderful new variety from the market gardens of California—where only the best is grown. Again we predict that within a very short time Paradise will have supplanted all other kinds, and will be the standard market and commercial variety in all sections. It is similar in appearance to Mary Washington, and was developed as a sport of that variety by an Asparagus grower in Southern California. Stems are large, same color as Mary Washington.

The opportunities for a quick profit from Paradise are now greater than ever before. With America calling for increased production of all food stuffs, canners are demanding greater and greater supplies. Paradise fully meets their requirements, being especially suitable for both canning and freezing under new process.

BEARS 60 DAYS AFTER PLANTING

The last Degree in production for perfection, Size, Bright Color and Good Flavor.

The New Superfection is a tremendous bearer, in fact it is our belief that there has never been and probably never will be another Everbearing Strawberry that even approaches Superfection in qualities that make for perfection.

BIG PROFITS — 2 CROPS A YEAR. Plant this spring—pick all summer—you'll get back the price paid for the plants, and most important, a big profit besides. You'll harvest another fine crop the following June—two crops in one year. Unlike most everbearers, this variety is an excellent plant maker.

The plants are very healthy and vigorous, producing an abundance of runners, which bear fruit the first season. A couple of rows across your garden will give you lots of berries.

Berries are large, bright red, firm, roundish in shape, rather tart but good flavor and quality. For preserves and freezing they are excellent, because they hold their shape and color. Good for dessert or culinary uses. Very attractive in appearance and sell well on the fresh fruit market. 20TH CENTURY

A new everbearing strawberry that has both eye and taste appeal, plus being a top producer of big red, honeysweet berries of excellent quality.

Never has a strawberry become so popular as quickly as 20th Century. The reasons are simply that it produces so heavily big red berries of fine flavor.

The berries are round, of exceptional large size from the first picking to the last. The fruit is uniform in size and has a rich red coloring all the way through, is very firm and solid, making an excellent distant shipper. The rich sweet flavor is of the best—really honeysweet, retains this delightful flavor when frozen. A berry of superior quality for freezing, jams and jellies.

Plus being a top producer, it starts bearing in 60 days after planting and continues until frost stops it in the fall. Its yields are very heavy, as has been indicated by its record producing from July to November. Will grow in any soil or climate, also makes a good fruiting row. We recommend this new variety for your garden, you will be more than pleased. Prices: 25 plants for \$2.10; 50 for \$3.95; 100 for \$6.85; 250 for \$15.95; 500 for \$28.95, POSTPAID.

NEW RED RICH EVERBEARING STRAWBERRY

SO NEW—SO EXCITING—SO DIFFERENT that it flashed into headlines of thousands of newspapers across the land . . . that's **RED RICH**, the new berry . . . the strawberry that's got everything.

RED RICH UNSURPASSED FOR FREEZING

Unsurpassed for freezing, **RED RICH** is a deep red clear through. It possesses an abundance of natural sugar—less of yours for preparation. Solid and firm, **RED RICH** holds its natural eye appealing qualities when thawed—it won't mush up. Too, it makes a better dessert or preserve because it is big and red and sweet.

Even in its earlier development a one acre planting of **RED RICH** yielded 4,000 quarts the same season it was planted. And in a second year **RED RICH** produced a June crop in matted rows from June 6 to July 6, like a June bearer, and then came through with a heavy yield in August, September and October to more than double the first year's crop. The crown and root system are exceptionally large as well as the leaves. It is a rugged, disease resisting plant that will produce outstanding yields.

THORNLESS BOYSENBERRY

OFTEN BEARS FRUIT 2 TO 3 INCHES LONG

This is the extra ripening strain of Thornless Boysenberry with canes as smooth as a grape vine. RIPENS ABOUT TWO WEEKS EARLIER THAN BOYSENBERRY. The introducer claims even heavier yields from this Thornless Boysenberry than the common Boysenberry. This new strain Thornless Boysenberry is identical to the Boysenberry except that there are no thorns and it ripens earlier. This is a good feature as the early berries bring much more money. The Thornless is as hardy, rugged and heavy bearing as its parent the Boysenberry. Vines grow long, and this pretty apple-green vine loaded with giant purple beauties is a sight you will never forget, and after you taste a handful of them, other berries will go begging for a while. Delicious with cream and sugar, and when made into jam, it's the last word. ZILKE'S NEW 'BLACK MAGIC' EVERBEARING BLACK RASPBERRY

You may have heard of

EVERBEARING STRAWBERRIES

OR

EVERBEARING RED RASPBERRIES

or perhaps, even

EVERBEARING BLACKBERRIES

But have you ever heard of EVERBEARING BLACK RASPBERRIES? Well it's here now, ZILKE'S HAVE IT, and it's really a BEAUTY.

The "Black Magic" Everbearing Raspberry ripens early, it starts to ripen with the well known Early Logan variety. After the summer crop is picked, Black Magic begins producing on the tips of the new canes and side branches, Black Magic not only has fruit on the tips of the new wood, it develops side branches, which are also helps in extending the fruiting season. Black Magic starts with the earliest black raspberry and from there on in until fall or freezing weather it has ripe berries, green berries and blossoms all at the same time.

BLACK MAGIC IS VERY HARDY

This new Black raspberry was found in the high altitude of West Virginia. Its origin at this high altitude would assure its being winter hardy and capable of thriving throughout the northern part of our country. We have fruited Black Magic in the state of Michigan for the last seven years, without winter injury to the plant or the crop.

BERRIES ARE GOOD IN SIZE AND QUALITY

The summer crop of berries are about the size of Cumberland, the fall or everbearing crop is larger than Cumberland or Logan. The canes are very vigorous and productive. Most of the berries are about $\frac{3}{4}$ of an inch in diameter when ripe. The fall crop is larger in size than the summer crop. Price: 1 year No. 1 plants, 6 for \$3.50; 12 for \$6.50; 25 for \$11.95; 50 for \$21.45; 100 for \$38.95; 250 for \$88.00; 500 for \$160.00. FOR BEARING AGE PLANTS SEE PAGE 22.

Bears very heavy crops of large, glossy-black berries, fruit is large, sweet, jet-black, nearly seedless, excellent quality. The bushes are hardy, vigorous growers, healthy, strongly resistant to the usual raspberry disease. Bristol is considered a top quality blackcap that is widely adapted in all raspberry sections, rapidly coming to the top among commercial growers and gardeners. IF YOU ARE INTERESTED IN ONE OF THE BEST BLACK RASPBERRIES, YOU SHOULD BY ALL MEANS, TRY THE NEW BRISTOL. Price: 1 yr. The "Miracle Plant Food" Ra-Pid-Gro

A complete, quickly available, easily prepared plant food by merely adding one pound of RA-PID-GRO to 22 gallons of water

WHAT IS A RA-PID-GRO?

RA-PID-GRO is a complete concentrated plant food formula. Easily made into an immediately effective liquid fertilizer by simply adding water. It will speed up growth of plants now in place and will assure more successful transplanting of new plants.

HOW IS IT USED?

RA-PID-GRO is so easily prepared for use. Just add water at the rate of 1 lb. of RA-PID-GRO to 22 gallons of water. Allow to dissolve and it's ready for use. Apply around each plant according to directions on the bag. For use on small numbers of plants mix at the rate of a teaspoonful to the quart of water. Also very valuable for use when transplanting. Dip plants in solution for 3 or 4 minutes, then set in place and water with remainder of liquid. Practically eliminates losses.

WHAT WILL IT DO?

RA-PID-GRO will work almost unbelievable miracles in promoting rapid and healthy growth on all types of plants. Use it on lawns, around shade trees, evergreens, shrubs, roses, perennials, vegetables and house plants. Many times plants which have been given up for dead will respond to applications of RA-PID-GRO. All the vital plant food elements are present in this remarkable discovery and since it is applied in liquid form, are readily available to the roots of the plant.

HOW DOES ITS COST COMPARE WITH OTHER FERTILIZERS?

RA-PID-GRO is less expensive than other fertilizers. In the larger quantities it makes your fertilizer cost about 1/2 cent per pound as against a cost of about 3 cents per pound for average fertilizers. Remember, 1 pound of RA-PID-GRO makes 176 pounds of rich and complete plant food.

NEW IN - THE - ROW PLASTIC GREENHOUSE

GROW MORE FLOWERS AND VEGETABLES 1 TO 2 MONTHS EARLIER.

Complete, Prefabricated Kit!
Ready to Use!

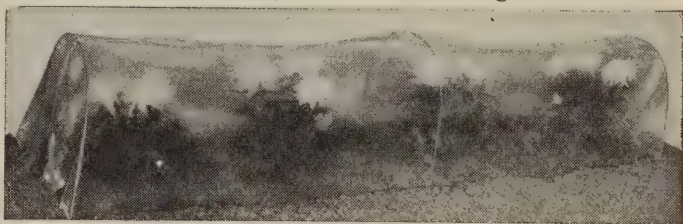

PROTECT PLANTS FROM BELOW-FREEZING TEMPERATURES

Specially-made plastic covering, supported by wire wickets, admits warmth of sun, prevents damage from frost, wind and rain. Protects tender flowers and vegetables from cold weather. Gardening can be started 1 to 2 months earlier. Just plant seeds or set out transplants and cover with In-The-Row PLASTIC GREENHOUSE. Special ventilating openings prevent over-heating of plants on warm, sunny days. They also permit inspection and cultivation of the plants. The openings close easily to seal out frost.

USE IN THE FALL, TOO

By covering late-started plantings with this NEW PLASTIC GREENHOUSE, flowers and vegetables can be grown to full maturity long after hard frosts have killed unprotected plants.
